

# Test Report

Document No.	01199-21-0509	Copy No.	1	Number of pages	27
Apparatus	LV fuse-links				
Designation	Fuse-links type B, Fuse-links type 5237				
Serial Number	Test samples				
Manufacturer	THS Industria e Comercio Ltda.				
Client	THS Industria e Comercio Ltda. Rua Sargento Francisco Rodrigues da Rosa, 534 Bairro - Cajuru do Sul - Sorocaba 18105-008 Sao Paulo BRAZIL				
Date(s) of test(s)	01 October 2021				
Tested by	IPH Institut „Prüffeld für elektrische Hochleistungstechnik“ GmbH Landsberger Allee 378A 12681 Berlin GERMANY				
Test(s) performed	Verification of the breaking capacity - Test No. 1				

The apparatus, constructed in accordance with the description, drawings and photographs incorporated in this document has been subjected to the series of proving tests in accordance with:

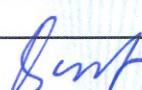

Client's request, on the base of  
IEC 60269-6 Ed. 1.0: 2010-09 + Corrigendum December 2010  
DIN EN 60269-6 (VDE 0636-6): 2011-11

For test results see Sub-clause 3.6

The results are documented in this test report. The ratings assigned by the Manufacturer are listed on the ratings page.  
The document applies only to the apparatus tested. The responsibility for conformity of any apparatus having the same designations with that tested rests with the Manufacturer.

04 November 2021

IPH Institut "Prüffeld für elektrische Hochleistungstechnik" GmbH  
is accredited testing laboratory by DAkkS according to  
EN ISO/IEC 17025:2018. The accreditation is valid only for the scope  
listed in the annex of the accreditation certificate D-PL-12107-01-00.

## Notes

### STL-Member

CESI Group members are founder members of the SHORT-CIRCUIT TESTING LIAISON (STL) which has been established in 1969. STL is a forum for voluntary international cooperation of testing organizations.

### CESI Group Test Documents description

#### Type Test Certificate of .....

Issued for type tests of high voltage products ( $> 1 \text{ kV}_{\text{ac}}$ ;  $> 1,5 \text{ kV}_{\text{dc}}$ ), which have successfully been carried out in full compliance with the relevant specifications or standards and STL Guides valid at the time of the test. The Type Test Certificate consists of documents unequivocally identifying the test object and describes all conditions under which the tests were conducted. It gives evidence of the unobjectionable behavior of the test object during the tests in line with the normative documents applied as well as of the results of successful testing.

#### Test Certificate of (complete / selected) Type Tests

Issued if type tests of low voltage products ( $< 1 \text{ kV}_{\text{ac}}$ ;  $< 1,5 \text{ kV}_{\text{dc}}$ ) requested by the relevant product standard were passed. For these tests the equipment under test must be clearly identified by technical description, drawings, and additional specifications.

#### Certificate of Design Verification

Issued for passed design verification tests according to IEC 61439. For these tests the equipment under test must be clearly identified by technical description, drawings, and additional specifications.

#### Type Test Report

Issued for high and low voltage products if parts of selected type tests have been passed; those shall be carried out in full compliance with the relevant standards but (for high voltage products) do not fulfill all STL requirements for issuing a Type Test Certificate. For these tests the equipment under test must be clearly identified by technical description, drawings, and additional specifications.

#### Test Report

Issued for all other tests on high and low voltage products which have been carried out according to specifications, standards and/or client instructions

#### On-Site Test Record

Issued as a record of results acquired during the on-site tests / measurements

#### Test Award

Can be additionally issued for all named types of test documents above if the tests to be referenced were passed

**Ratings and characteristics assigned by the manufacturer**

Description	Rating
Rated voltage	DC 1500 V
Characteristic	gPV
Breaking capacity	10 kA
Rated current type B type 5237	1, 2, 8, 10, 12, 16, 20, 30 A 6, 8, 10, 15, 20, 30 A

Entry of test objects at IPH: 06 September 2021

Condition of test objects at delivery: New and undamaged

Year of manufacturing: 2021

**1. Present at the test**

---

Mr. Rainer Borchert IPH test engineer in charge

**2. Test performed**

---

Verification of the breaking capacity - Test No. 1

**3. Verification of the breaking capacity****3.1 Test laboratory**

Low-voltage test laboratory, test room 1

**3.2 Normative document**

According to client's request, on the base of  
IEC 60269-6 Ed. 1.0: 2010-09 + Corrigendum December 2010  
DIN EN 60269-6 (VDE 0636-6): 2011-11

**3.3 Required test parameters**

Test voltage: DC 1500 V

Test current: 10 kA

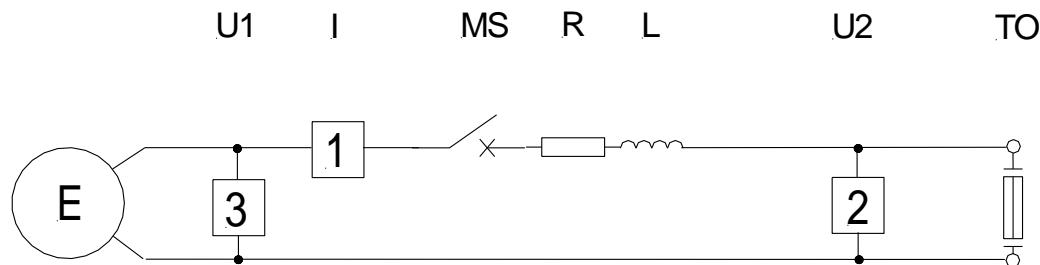

Time constant: 1...5 ms

**3.4 Test arrangement**

According to  
IEC 60269-6 Ed. 1.0: 2010-09 + Corrigendum December 2010,  
DIN EN 60269-6 (VDE0 636-6): 2011-11, Sub-clause 8.5.1

### 3.5 Test and measuring circuits

Technical data of test circuits

<b>E</b>	Power supply	<b>TO</b>	Test object
<b>MS</b>	Making switch	<b>U1</b>	Test voltage measurement
<b>L</b>	Test circuit inductance	<b>U2</b>	Voltage measurement
<b>R</b>	Test circuit resistance	<b>I</b>	Current measurement
		<b>1 - 3</b>	Measuring points

Figure 1: Test circuit for the test of the breaking capacity

Technical data of measuring circuits

Measuring point	Measured quantity	Measuring sensor/device
1	Current	Shunt
2	Voltage	RC divider
3	Test voltage	R divider, digital voltmeter
<b>Recording instrument for measuring points 1 and 2:</b>		
BE256 transient recorder		

### 3.6 Test results
